

Kessler Pocket Jib™

The Kessler Pocket Jib™ is the ultimate compact, portable jib. Not only is this jib fully collapsible for easy transport, but you can also mount the Kessler Pocket Dolly™ to it, turning it into a virtual "all-in-one" production tool, offering both a jib and mini-dolly in one unit. The Pocket Jib™ has a telescopic dual rail arm design that has a maximum reach of five feet, fully extended, which is approximately 6" less than our KC-8 crane. The end of the crane arm features a ball relocater with 100mm bowl, so you can mount a 100mm ball fluid head. The weight bar system is also telescopic and collapses and folds away for easy transport.

The Pocket Jib™ comes standard with the Swivel Mount that allows you to mount the Pocket Jib™ to your tripod using a 100mm levelable ball, 75mm fixed ring mount, or a flat mount. If you would like to mount the Pocket Jib™ to your Hercules 2.0 head, the Swivel Mount can be removed and the Pocket Jib™ mounted flush to the Hercules 2.0 with the tilt locked with the pin lock in place.

Unit Weight: 21 lbs.

Weight Capacity: 35 lbs (arm extended) & 50 lbs (arm compacted)
